PROFESSIONAL SUMMARY

BSIT Software Development student at Mapúa Malayan Colleges Laguna nearing graduation, seeking an IT internship to apply and further develop skills in full-stack web development, backend systems, AI integration, and DevOps. Hands-on experience with JavaScript, React, Next.js, Node.js, Express.js, databases, REST APIs, automated testing, and CI/CD through academic and capstone projects.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, SQL
- **Frontend:** React, Next.js, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, Webhooks
- **Databases:** MongoDB, MongoDB Atlas, PostgreSQL, Supabase, MySQL
- **Testing:** Jest, Supertest, MongoMemoryServer
- **Tools & DevOps:** Git, GitHub Actions, Docker, Docker Compose, Nginx, Prometheus, Grafana, Android Studio, Android SDK, Gradle, Tableau, Chart.js

RELEVANT PROJECT EXPERIENCE

NervLess — AI Mock Thesis-Defense Simulator (Capstone Project) | TypeScript, CSS, PLpgSQL, Next.js, Supabase, pgvector, Google Gemini Multimodal API

- Lead 50%+ of frontend development, translating approved Figma wireframes into responsive Next.js interfaces.
- Designed system architecture and entity-relationship diagrams using Lucidchart and Eraser.io.
- Built a browser-based speech recognition widget to support interactive mock-defense sessions.

BrainBytes AI Tutor — DevOps Terminal Assessment | HTML, JavaScript, Node.js, Express, Next.js, MongoDB Atlas, Docker, GitHub Actions, Prometheus/Grafana

- Hardened CI/CD pipeline: removed unsafe error-suppression flags, added TruffleHog secret scanning, and enforced npm audit checks.
- Implemented backend API tests using MongoMemoryServer and added environment-variable fail-fast guards.
- Built Mongoose schemas and REST endpoints for core learning-material features; set up monitoring with Prometheus, Grafana, and Alertmanager.

CaféFind — Full-Stack Café Discovery Web Application | HTML5, CSS3, JavaScript, Node.js, Express.js, REST APIs, Data Persistence

- Developed a responsive café discovery web application with search, filtering, favorites, profiles, and user workflows.
- Built frontend and backend functionality using JavaScript, Node.js, and Express.js, with API-based frontend-backend communication.
- Implemented data persistence, validation, functional testing, and iterative development to create a maintainable, user-centered application.

EDUCATION

Bachelor of Science in Information Technology, Software Development | Mapúa Malayan Colleges Laguna (MCL)

- Completed 149 / 161 required credits; approaching graduation.
- Relevant coursework: Data Visualization Techniques, Object-Oriented System Analysis & Design, System Administration & Maintenance, Web Systems & Technology, Mobile Development, DevOps, Platform Technologies.
